

Necessity is the Mother of Invention

INTRODUCING MILKMATE

Mother, MilkMate Founder and CEO Patrice Meagher has been on a mission to make life easier for working mothers for many years. The mother of four herself has not just pushed for change but has *invented* it. MilkMate began with the belief that **no mother should ever have to choose between career and family** because of the challenges faced with breast pumping in the workplace.

MilkMate is an all-in-one, multi-user modular breast pumping solution for the workplace that comes with pre-sterilized and pre-assembled parts ready for immediate use. With MilkMate, lactating employees no longer have the stress of lugging all supplies to and from the workplace or cleaning breast-pumping equipment in public spaces.* Finally, employers can offer a solution to feel more comfortable, productive, and happy at work—leading to increased retention and further recruitment of female talent.

New Legislation is Great News for Working Moms of New York

THE PUMP ACT PASSES!

In December 2022, the U.S. Senate advanced workplace conditions for working moms who are breastfeeding by passing the Providing Urgent Maternal Protections for Nursing Mothers Act (**known as the PUMP Act**).

In addition, New York Governor Kathy Hochul recently signed legislation to expand accommodations for breastfeeding and breast pumping in the workplace.

Legislation (S.4844-B/A.1236-A) requires all employers in New York to ensure that pumping spaces are convenient and private, as well as include seating, access to running water and electricity, and a working space.

Contact MilkMate today to learn more about modernizing the breast pumping solution for your workplace.
